

## Supplementary material

S1 Table. Multinomial logistic regression of post-migration educational investments on years of schooling in country of origin.

Variables	P(Y=1) No schooling		P(Y=2) Schooling, no diploma		P(Y=3) Schooling, diploma	
	dy/dx	se	dy/dx	se	dy/dx	se
Years of schooling in origin country	-0.010***	(0.002)	0.002	(0.001)	0.009***	(0.002)

Note: Presented are average marginal effects. Variables included in main analysis (Table 3) are included as control variables, except for dummy variables for education in country of origin. Presented are only results for years of schooling in origin country. \*\*\* p<0.01, \*\* p<0.05, \*p<0.1. N = 3,385
